Rescue Techs

For all your rescue needs:

- **Training**
- **Consulting**
- **Equipment**
- **Rescue standbys**

We are the:

“confined space specialists”

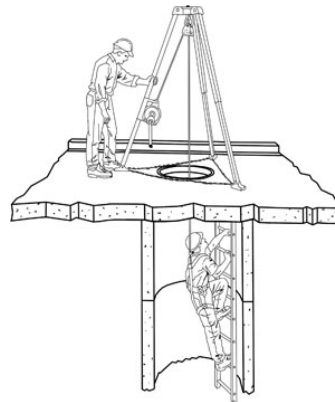

Confined Space rescue standby

Confined space workers kept safe by **Canada Rescue Techs**

When municipal workers need to enter confined space for maintenance or repairs confined space rescue services must be alerted and available. Rescue services can be provided by municipal fire / rescue teams, their own trained and equipped personnel or in this case a private service provider.

When this major cities municipal works team realized they did not have rescue services

for their workers entering confined spaces outside of their city boundaries, the decision to source an outside private agency was an obvious cost effective alternative.

Canada Rescue Techs showed up on site, assembled required equipment, and completed rescue pre plans within minutes to allow workers to safely

enter the confined space.

Providing gas testing and monitoring capabilities as well as performing requirements of the hatch watch person adds to the value of hiring **Canada Rescue Techs**.

Canada Rescue Techs rescue standby services

For times when it is not economically feasible to train and equip your own confined space entry rescue team, **Canada Rescue Techs** has a fully equipped mobile command trailer for rescue standby. For IDLH or non-IDLH entries you can rest assured that the

appropriate man power with equipment, training and experience. **Canada Rescue Techs** has proven to be cost effective for industry as we can provide hatch watch, gas testing and rescue services all in one convenient package. With decades of experience in a vari-

ety of emergency response services, we will keep your workers safe and your company work safe compliant.
