Rescue Techs

For all your rescue needs:

- **Training**
- **Consulting**
- **Equipment**
- **Rescue stand-bys**

We are the:

“confined space specialists”

Confined Space rescue training

Vancouver Island Shipyard

12 person Rescue Team Well Trained by **Canada Rescue Techs**

Some of the tightest and most complicated confined spaces, with multiple compartments. That is the challenge that faced **Canada Rescue Tech's** confined space rescue training team when they took on the assignment of training the onsite rescue team for a southern Vancouver island ship yard.

With many years of experience in shipyards our team

was up to the challenge and completed the mission in a four day training session. After an initial assessment of the companies procedures, equipment, and current training levels **Canada Rescue Techs** were able to recommend and supply appropriate equipment and training for the company to become compliant with Worksafe B.C. regulations.

Multi usage training props were created onsite to simulate all of the types of entries encountered in the working environment including IDLH (immediately dangerous to life and health) atmospheres.

Thank you team for making **Rescue Techs** your trainers of choice and being one of the most skilled teams to date! We enjoyed our time with you!

Canada Rescue Techs training services

From the forepeak of a destroyer to the IDLH environment of a sulphur dioxide storage tank, Our training techs have the experience to provide top quality training for any industrial worksite.

We also offer courses in high angle and low slope rescue as

well as emergency vehicle driving courses for municipal fire depts.

All of our courses are custom designed after consultation to meet the specific requirements of each of our clients.
